Education

I.P.S. Academy, Institute of Engineering and Science Bachelor of Technology in Computer Science and Engineering	CGPA: 8.6 / 10.0	Indore, India Aug 2022 – May 2026
Kailashpat Singhanian High School Senior Secondary (Class XII)	Percentage: 82%	Chhindwara, India 2022

Technical Skills

Programming Languages:	C++, Python
Frontend / Backend:	HTML5, Tailwind CSS, Node.js, Express.js, React.js
Databases:	MySQL, MongoDB
Tools & Platforms:	Git, GitHub, VS Code, Vercel
Core Concepts:	Data Structures & Algorithms, OOP, DBMS, Operating Systems

Projects

GenHire *React.js, Node.js, Express.js, MongoDB, Gemini AI, JWT, Tailwind CSS* [GitHub](#) [Live Demo](#)

- Built a full-stack AI interview prep platform that uses the Gemini AI API to read resumes and job descriptions, then generates ATS feedback, skill gap reports, and personalized study plans.
- Added JWT login with bcrypt password hashing, token blacklisting on logout, used Multer for file uploads, PDF-Parser to extract resume content, and Zod to validate AI responses.
- Automated PDF resume generation with Puppeteer and deployed the complete app as a responsive, web application serving end-to-end interview preparation workflows.

Swaad Mahal *HTML, Node.js, Express.js, MySQL, Tailwind CSS* [GitHub](#) [Live Demo](#)

- Built a full-stack restaurant platform where customers can browse the menu, place food orders with a multi-item cart, and book tables online through a clean, mobile-responsive interface.
- Created a REST API backend with Node.js and Express.js connected to a MySQL database; designed separate tables for orders, order items, and reservations to keep data organized and easy to query.
- Handled the complete booking flow — guests can specify date, time, party size, occasion, and special requests — with GET, POST, and DELETE endpoints consumed directly by the frontend.
- Used dotenv to manage database credentials securely, connected to MySQL via mysql2, and enabled CORS so the frontend and backend can be deployed and run independently.

Achievements & Certifications

Problem Solving

- Solved 150+ DSA problems on LeetCode and GeeksforGeeks covering arrays, hashing, trees, sorting, recursion, and time/space complexity optimization.
- Maintained a CGPA above 8.0 consistently across all semesters in a competitive Computer Science engineering curriculum.

Certifications

- Python Programming — Coursera
- OCI AI Foundations Associate — Oracle
- Mastering MySQL — Udemy
