About

A **Snowflake-certified** data engineer with 1.5+ years of experience engineering production-grade cloud data pipelines using Python, SQL, and DBT. Proven track record of processing 100M+ rows of financial data and optimizing reporting layers to cut semantic model sizes by 75%.

Skills

Languages: Python, Java, SQL

Cloud & Tools: Snowflake AI Data Cloud, Data Build Tool (DBT), Azure, Git

Problem Solving: Data Structures and Algorithms

Experience

Accenture / Data Engineer

October 2024 - Present, Telangana, India

- Engineered an end-to-end scalable 6-layer DBT pipeline in Snowflake (Data Vault 2.0) processing 100M+ rows of Oracle Fusion financial data.
- Delivered 20+ DBT models using the client's coding standards and custom macros within an agile framework.
- Optimized the financial reporting layer by implementing a star schema, cutting the PowerBI semantic model size by 75% and boosting performance.
- Translated complex business requirements into Source-to-Target Mappings for over 15+ DBT models.

Frontlines EduTech / Technical Assistance Support Intern

July 2024 - September 2024, Remote

- Built OpsBoard using Flask for 1M+ learners by creating & using 7 REST APIs for session/course management.
 - Automated multi-channel notifications via WATI & Brevo APIs, reducing manual outreach and enabling real-time updates for new courses.
 - Automated Zoom attendance tracking via Zoom API and cron jobs, reducing manual data entry by 90% with direct database ingestion.
-

Education

V. R. Siddhartha Engineering College / B. Tech in Computer Science

June 2020 - April 2024, Andhra Pradesh, India

- Graduated with a cumulative GPA of 9.04.
 - Authored two Scopus-indexed **research articles** on Explainable AI for diseased crop detection and geospatial soil salinity classification using remote sensing.
 - 468/1000 GATE score.
-

Awards

Tech Expressway Merit Holder – #1 out of 70 in Accenture Java ASE training (Wall of Fame).
